

Inkplate 6

Inkplate 6: open-source 6" e-paper display with ESP32, WiFi/Bluetooth, ultra-low power, Arduino/MicroPython ready. Plug-and-play for hobbyists & makers.

Suits projects that show information for long periods without draining a battery — signage, weather displays, status boards.

Key specifications

Display Size (inch)	6 inch
Resolution	800 × 600 px
Display Color	Grayscale
Full Refresh (s)	1.26 s
Microcontroller	ESP32 WROVER-E

Getting started

Connect it to your computer with a USB-C cable, then load your first image using the Arduino library or the MicroPython module.
